Title: Research Analyst

Who We Are:

Concentrated poverty remains an endemic feature of American cities. Residents of low-income communities suffer higher rates of crime victimization and greater exposure to environmental contaminants. Their children experience worse schooling outcomes and limited access to healthy food. Many struggle with irregular employment and unstable housing. The path to social mobility is foreclosed by limited opportunities to gain new skills, and limited availability of affordable financial products. While social enterprises work hard to address these challenges with innovative solutions, policymakers and practitioners struggle to make sustained progress due to a lack of evidence about what works. We launched the University of Chicago Poverty Lab in 2015 to test innovative approaches to addressing the intersecting challenges faced by low-income residents of our cities. We bring the best science and “big data” analysis possible to bear on the problem of policy design, leveraging government administrative data to guide local policy and to generate high-quality evidence about what works. We believe that carrying out this work in very close collaboration with policymakers helps keep us focused on the most important real-world problems, and increases the chances that our findings translate into real-world impact. Program areas currently include college access, workforce development, housing/homelessness, and financial stability.

The Role:
The University of Chicago Poverty Lab is seeking a Research Analyst with strong research, methodological, and programming skills to support social policy research projects. The Research Analysts will have the opportunity to apply tools and approaches from methodologies in both traditional econometrics and modern data science to original projects impacting youth services, financial empowerment, and workforce development. In addition to supporting field-based randomized controlled trials, the Research Analyst will contribute to a growing practice of advanced analytical solutions to provide data-driven technical assistance to governmental and non-profit partners.

The successful candidate will have experience in applying a variety of statistical modeling approaches to large datasets in real-world settings. From project inception to delivery, the Research Analyst will contribute to all facets of data collection & cleaning, model development, and implementation. This position requires an individual who is able to work as a part of small research teams running multiple projects concurrently. The position offers the opportunity to work directly with leading social policy researchers at the University of Chicago and local city agency staff, as well as a team of administrative staff, project managers, and student research assistants from the Chicago office.

Duties and Responsibilities:
  • Works with partners to identify analytical approaches to solve specific research questions
• Holds primary responsibility for data management and analysis of experimental and quasi-experimental evaluations.
• Cleans, merges, and matches data, and runs sampling and randomization across multiple projects
• Prepares results of models for memos, spreadsheets, and presentations targeting both policymakers and academic researchers
• Assists with literature reviews and drafting papers
• Assists in writing grant proposals, preparing IRB proposals, and obtaining other research permits
• Other duties as assigned

Education:
• Bachelor's degree in economics, sociology, public policy or other relevant social/mathematical science field
• Coursework in econometrics and/or mathematical statistics
• Master's degree

Experience:
• A minimum of one year of relevant research experience. Experience gained in school counts towards requirement
• Experience working with large and complex datasets
• Proficiency with one or more languages such as R, Stata, Python, or SAS
• Experience with relational databases a plus
• Experience working on field experiments
• Experience working with GIS and UNIX servers
• Familiarity with randomized controlled trials

Competencies:
• Strong interest in social policy
• Strong background in applied statistics & modeling
• Strong written and verbal communication skills
• Ability to manage multiple projects simultaneously and meet tight deadlines
• Excellent organizational skills and attention to detail
• Ability to work both independently and as a team member
• Ability to work discretely with sensitive and confidential data

To Apply:
Submit resume, cover letter, writing sample, and transcripts to the University of Chicago’s Workday System. Search for requisition number JR04805. Note: When applying, all required documents MUST be uploaded under the Resume/CV section of the application.

• If you have an active UChicago Workday employee account, you will need to complete the Internal Candidate application process. Internal Candidate instructions: Log into Workday and select the career worklet.
• **External Candidates** should apply to the position at https://uchicago.wd5.myworkdayjobs.com/en-US/External

• **If you have questions about the Workday application system**, please contact: https://uchicago.service-now.com/sso?id=ssc_sc_cat_item&sys_id=cf359d671316660030c0bca43244b02d.
